

Directions

Cobalt's offices are situated in Basingstoke.
Basingstoke is situated 50 miles to the West of London on the main routes to Southampton

Approaching Basingstoke from the M3
Exit at Junction 6. From the roundabout under the Motorway a short spur road leads directly to a second larger roundabout. At this roundabout, take the second exit, onto a dual carriageway following signs to Newbury. Be sure to take the second sliproad exit, signposted Daneshill, after only 400 yards. Get into the right hand lane. At the T-junction, go right under the concrete bridge and at the next roundabout take the second exit into Wade Road. The Intec Business Park is 400 yards along on the right.

Approaching Basingstoke from the M4 West (or the North of England via the A34)
From the M4 Junction 13, go South on the A34. Within half a mile turn off to take the A33 signed for Newbury. Do not continue to follow the A34 even though it is signed for Basingstoke. Continue on A33 for approximately 14 miles. The road will become dual carriageway on the outskirts of Basingstoke to form the Northern section of the Basingstoke Ring road. At the second junction of this dual carriageway section take the sliproad signposted Reading (A33). Get into the middle lane for the roundabout and take the second exit, Faraday Road. Continue for 300 yards to another roundabout. Take the first exit into Wade Road. The Intec Business Park is 400 yards along on the right.

Approaching Basingstoke from the M4 East (coming from London)
Exit at the M4 Junction 11. Go right onto the A33 heading South. Continue on A33 for approximately 11 miles. After passing through major traffic lights for the first time, get into the right hand lane of the dual carriageway. At the next roundabout (Chineham shopping centre), take the 2nd exit and then almost immediately the 1st right, through filter traffic lights, onto Wade Road. Follow this road around the sharp hairpin bends and down the hill. The INTEC Business Park is then on the left.

Within the Intec business park
After passing through the security barrier, drive along the brick paving and take the second turning left, which lies beyond the speed bump and the rumble strip. As you turn you will see, on the left hand side, an entrance signed Intec Studios. Cobalt is on the top floor of that wing of the Intec 2 building. There is limited parking in the various bays opposite that entrance.
